

Figure 1: Location of Cascabel project in northern Ecuador, highlighting the significant capital advantages held by the project, with proximity to ports, road infrastructure, hydro-electric power stations and the trans-continental power grid.

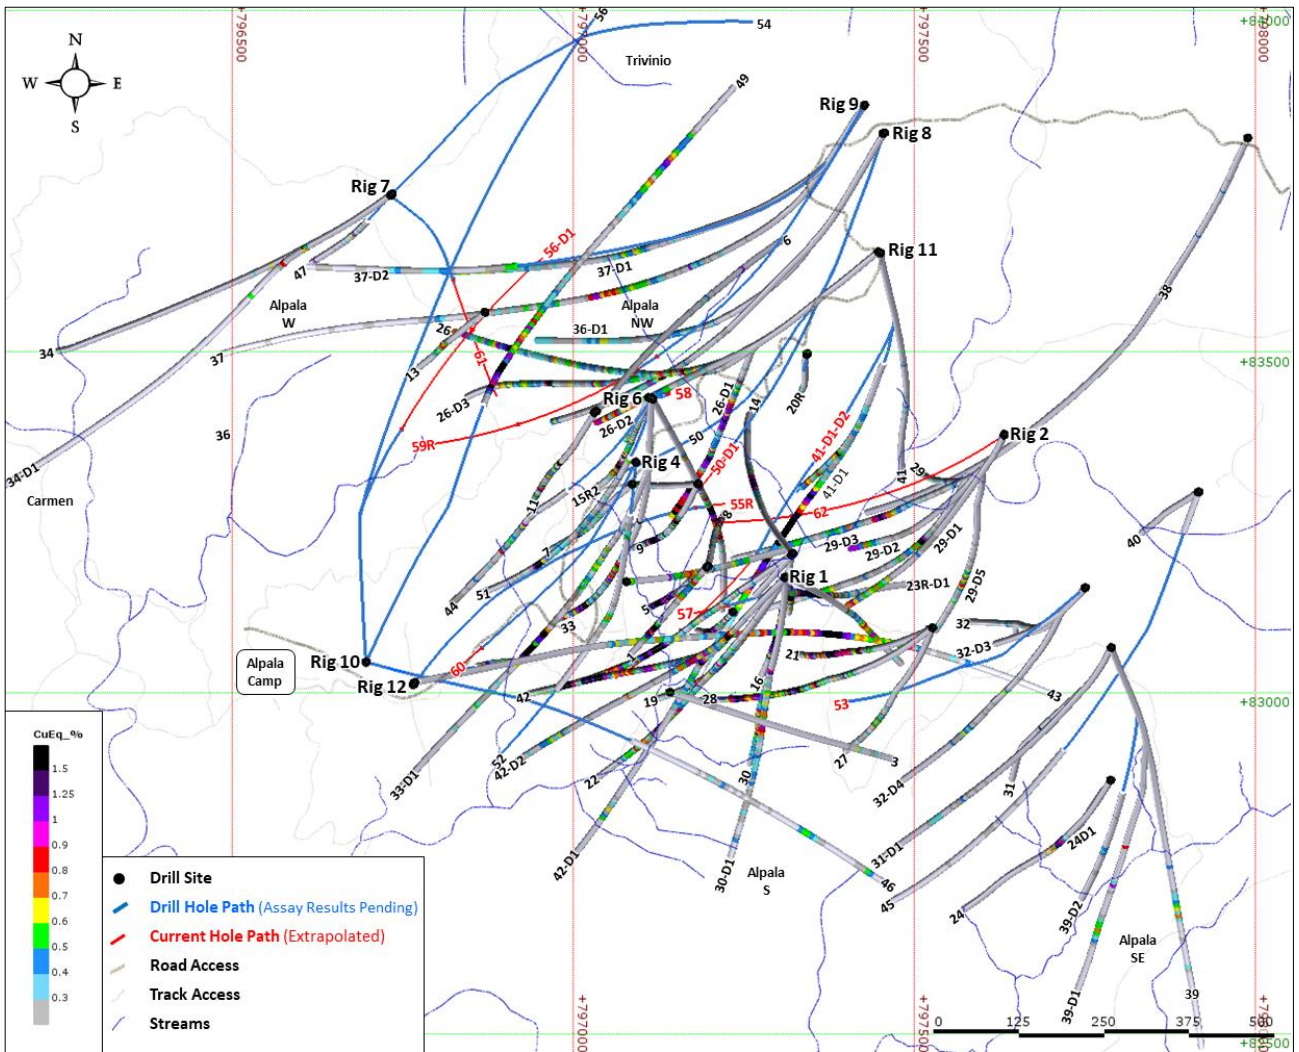

Figure 2: Drill Hole Plan along the greater Alpa area, showing copper equivalent assay results, current drill holes depth and intervals awaiting assay results indicated in **blue** and current hole path projections shown in **red**.

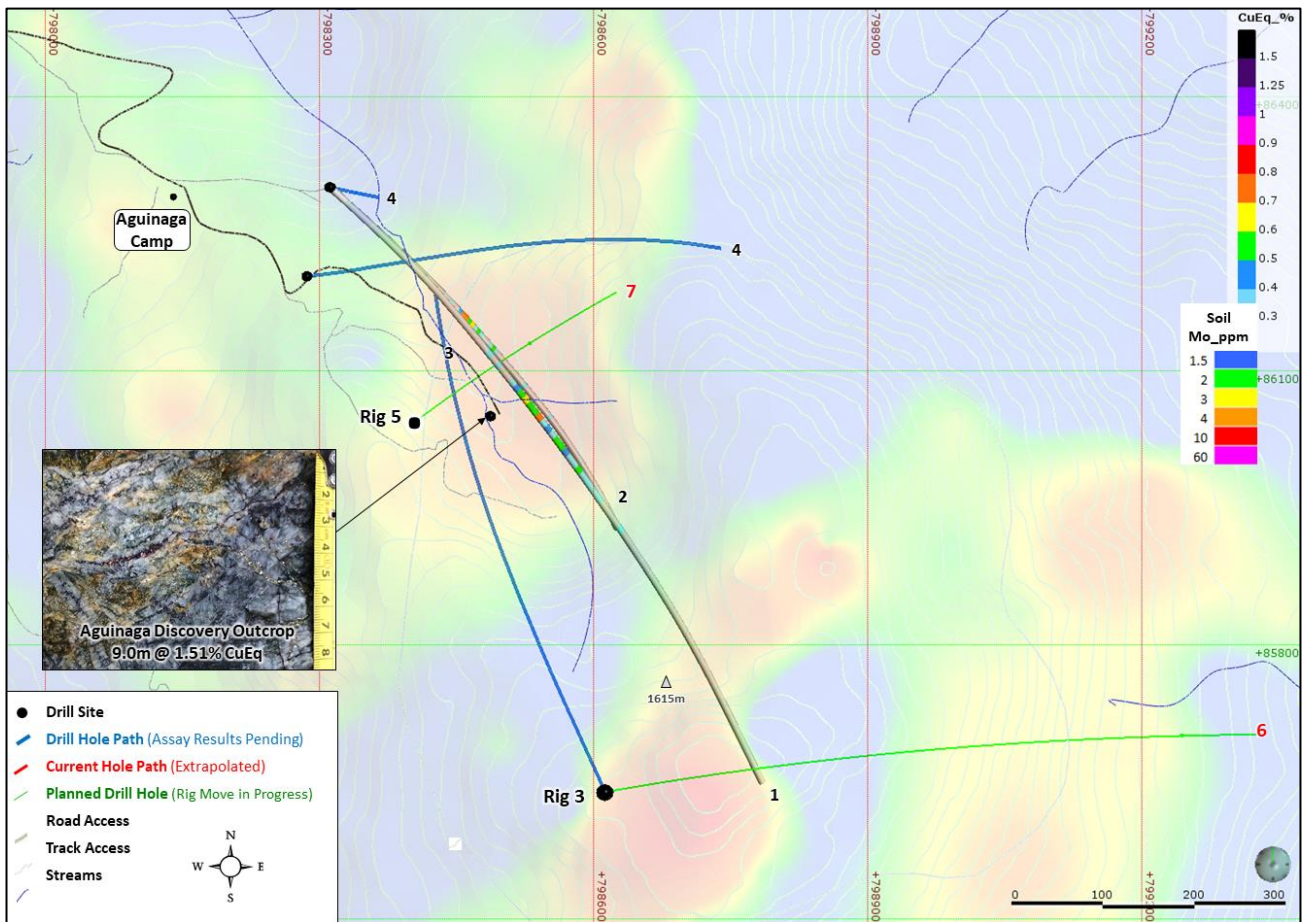

Figure 3: Drill Hole Plan over Aguinaga prospect area, showing copper equivalent assay results, current drill holes depth and intervals awaiting assay results indicated in **blue** and current hole path projections shown in **red**. Next planned drill holes aiming at high-grade targets are shown in **green**.
